

Vercare ISOLA

Natural emollient

Description and applications:

Vercare Isola is a 100% natural emollient, cost effective, with a silicone-like touch and excellent skin compatibility. It has low viscosity and quick absorption providing very good spreading and quick penetration properties.

Vercare Isola is what we call “polar” ester which provides an excellent solubilizing property of lipophilic cosmetic raw materials, showing remarkable stability with frequently used oils in diverse applications like sun care, skin care and hair care.

Vercare Isola imparts a dry lubricating feel in the presence of large amounts of mineral oil or vegetable oils, i.e. it de- oils mineral oil and degreases vegetable oils. The product acts as an anti-tacking agent.

INCI: Isoamyl Laurate

Dosage: 1 - 10 %

Physical properties:

Kinematic Viscosity	ca. 4 mm ² /s @ 40°C
Relative density	0,8532
Colour AP HA	< 70

Shelf life:

Two years as long as it is kept in closed original containers at recommended temperatures.
