## ABOUT GATTEFOSSÉ

Gattefossé develops, manufactures and sells specialty ingredients for the personal care and pharmaceutical industries.

Specialist in lipid chemistry and plant extraction, Gattefossé offers recognized expertise in formulation and technological advice to its customers, using its application laboratories. Innovation, ethics, quality and stability are the company key-drivers since the beginning.

Gattefossé markets its products in more than 60 countries through 12 affiliated companies and a network of agents and distributors.

Gattefossé was founded in Lyon, France in 1880 by Louis Gattefossé to whom building strong relationship with customers was a priority. The company still is a family-run and independent business, and now employs more than 280 people worldwide.

## EXPERTS IN LIPID CHEMISTRY AND PLANT EXTRACTION

We are expert in two complementary fields: lipid chemistry and plant extraction. This know-how enables us to meet the latest market trends in both natural performing actives and functional excipients, recognized for their sensorial benefits. A full package of technical data is available for each ingredient, including regulatory status, tolerance tests and environmental certificates.

## PROVIDING INNOVATIVE SOLUTIONS

Our commitment to innovation is based on our willingness to constantly move forward. We master formulation as well as sensorial analysis, we know our customers' business and use our technical centers of excellence to provide them with customized products and formulations all over the world. An extensive range of finished product prototypes illustrates the benefits of our ingredients.

## Contents

4-7

### ACTIVES

Our actives concentrate the best of nature and deliver their full potential to high efficacy formulations.

8-11

### EXTRACTS

Our natural extracts deliver the perfect activity boost to your formulations. Discover our wide range of fruit and plant extracts.

12-15

### TEXTURES

Our sensorial emulsifiers and texturizing agents allow the creation of innovative textures and varied formulations.

Our actives concentrate the best of nature and deliver their full potential to high efficacy formulations.

At Gattefossé, **we strongly believe in the potential of nature**. All our actives come from natural plant resources that are selected according to exhaustive research on their composition.

Our experts travel the world and build **a sustainable network of partners** in order to implement a sourcing procedure that fits the high level of specifications and quality commitments of the company.

High-tech extraction technologies

Our scientists use their **expertise in plant extraction** to select and develop new methods and processes that allow extraction and stabilization of active molecules.

At each development stage, the environment is a major concern. The discovery of inventive extraction processes using “green” solvents is an important part of today’s research program.

Performance & substantiation

As **proven efficacy is essential**, our cell culture laboratory allows us to be at the forefront of technology in testing. These facilities enable us to better understand the mechanism of action of our ingredients.

Clinical evaluations are designed and conducted in collaboration with partner laboratories. **The performance of our active ingredients is fully demonstrated and substantiated.**

Substantiation	Use Level	Claims	Packaging
<i>In vitro</i> <i>In vivo</i>	3-5%	Targets imperfections Purifies Fights existing blemishes	5 kg
<i>In vivo</i>	5%	Diminishes dark circles Fights under-eye bags Hides symptoms of fatigue	5 kg
<i>In vitro</i> <i>In vivo</i>	1%	Boosts cellular energy Protects from skin-emitted light Fights digital pollution	5 kg
<i>In vitro</i> <i>Ex vivo</i> <i>In vivo</i>	0.5-6%	Provides complete protection from oxidative stress Fights extrinsic and intrinsic aging Protects hair and skin from UV and environmental damage	5 kg 25 kg
<i>In vitro</i> <i>In vivo</i>	2%	Reduces secretion of pro-inflammatory mediators Diminishes clinical signs of inflammation Improves comfort of sensitive and hyper-reactive skin	800 g 4 kg
<i>In vitro</i> <i>In vivo</i>	2-5%	Instant myorelaxant effect Erases expression lines Smoothes and redesigns the lip contour	5 kg
<i>In vitro</i> <i>In vivo</i>	2%	Immediate results Reinforces the architecture of the dermis for tighter, firmer looking skin Enhances the density of the skin, leading to a reduction in roughness	5 kg 25 kg
<i>In vitro</i> <i>In vivo</i>	2%	Significantly reduces eye contour wrinkles: crow's-feet, tear trough and under-eye wrinkles Restructures and smooths the skin Fast acting	5 kg
<i>In vitro</i> <i>Ex vivo</i> <i>In vivo</i>	1-3%	Boosts skin microcirculation Enhances skin radiance and luminosity Anti-pollution	1 kg 5 kg
<i>In vitro</i> <i>In vivo</i>	2-5%	Reinforces epidermal architecture Increases skin moisture Reduces wrinkle depth	5 kg
<i>In vitro</i> <i>Ex vivo</i> <i>In vivo</i>	1%	Improves overall skin quality Visibly improves skin texture Leaves skin smoother, softer, suppler, and more comfortable	5 kg
<i>In vitro</i> <i>Ex vivo</i> <i>In vivo</i>	2%	Stimulates optimal reconstruction of dry or damaged skin Promotes natural regeneration for fresher, smoother, more radiant skin Restores skin barrier for enhanced moisturization and protection	4 kg
<i>In vitro</i> <i>In vivo</i>	3%	Reduces visibility and number of age spots Diminishes appearance of dark spots Lightens skin tone	5 kg
<i>In vitro</i> <i>Ex vivo</i> <i>In vivo</i>	0.5-2%	Stimulates collagen synthesis Restores mechanical properties of the skin Visible wrinkle reduction	1 kg 5 kg
<i>In vitro</i>	1-5%	Antioxidant Protects skin and hair from environmental stress Natural and stable colorant	1 kg 5 kg
<i>In vitro</i>	0.5-3%	Energizing Combats cutaneous stress Helps fight dull, tired skin	1 kg 5 kg
<i>In vitro</i>	5-10%	Boosts cell metabolism Provides essential nutrients Stimulates skin cell renewal	1 kg 5 kg 25 kg
<i>In vitro</i>	1-5%	Shields fibroblasts from UVA Stimulates natural cell defenses Provides deep skin protection	1 kg 5 kg
<i>In vitro</i>	1-5%	Protection from UVB Geno-protection Anti-glycation activity	1 kg 5 kg

# Extracts

Our natural extracts deliver the perfect activity boost to your formulations. Discover our wide range of fruit and plant extracts.

## Gattefossé, a history of plants

Since 1880, Gattefossé has been a **leading manufacturer of botanical extracts**, inspired by nature and created for the cosmetic industry. Our knowledge of the vegetal world enables us to offer a complete range of plant and fruit extracts for cosmetic use.

## Targeted extraction technologies

Our researchers develop and select responsible extraction processes to concentrate the best of nature, and therefore **maintain all benefits of the fresh plant**.

Environment being a major concern for Gattefossé, many of our extracts derive from the food processing industry, in the aim of sub-product valorization.

## True benefits

Used as co-actives, botanical extracts present many advantages: they are **easy to use and compatible with all types of cosmetic products**.

Particularly rich in essential nutrients, our extracts can be used for moisturizing, nourishing and anti-aging benefits.

Fresh Cells™ are cellular suspensions of whole, fresh fruit cells, obtained by a specific enzymatic process. When they come in contact with the skin, they release their precious content into the skin.

Fruit Secrets™ is a range of concentrated fruit juices, offering their benefits to natural cosmetics. They provide the skin with its daily dose of natural substances such as trace elements, amino acids and vitamins.

Original Extracts™ are living waters truly designed for cosmetic formulations. Directly obtained from fruits or plants, they contain a well-balanced content of trace elements, mineral salts and essential oils.

Discover or rediscover our wide range of botanicals. Oily and/or water soluble, they bring a natural touch to any cosmetic formulation.

Up to 100%	Boosts natural antioxidant properties, stimulates efficacy of vitamin C	20 kg

Our sensorial emulsifiers and texturizing agents allow the creation of innovative textures and varied formulations.

The texture is at the heart of a cosmetic product and is responsible for the creation of different sensations and reactions. For more than fifty years, our experts have contributed to develop a strong know-how in oleochemistry. Using their creativity and expertise, they innovate and create unique lipidic ingredients both functional and sensorial.

Natural origin

The majority of our portfolio is of 100% plant origin. Our latest developments illustrate our efforts in selecting original, secure and economically viable sources.

As a user of palm oil and palm kernel oil derivatives, Gattefossé is sensitive to the environmental impact of palm tree growing and participates in the development of sustainable cultivation, providing its customers with environmentally responsible ingredients.

Our company is an active member of RSPO (Roundtable on Sustainable Palm Oil) since 2010. In 2013, Gattefossé achieved the RSPO supply chain certification. Since then, we offer products certified RSPO Segregated and Mass Balance.

Formulation and sensory analysis

Our team of formulators is in charge of the evaluation of the texture ingredients and the creation of a wide range of cosmetic formulations.

As a texture is difficult to characterize with physical parameters, we have set up a sensorial panel for texture analysis. This internal panel of sensory experts works closely with our chemists since 1996 to better understand the behavior and benefits of lipochemical ingredients, pure or in formulation.
